

Teach  
Computing

A vector drawing is...

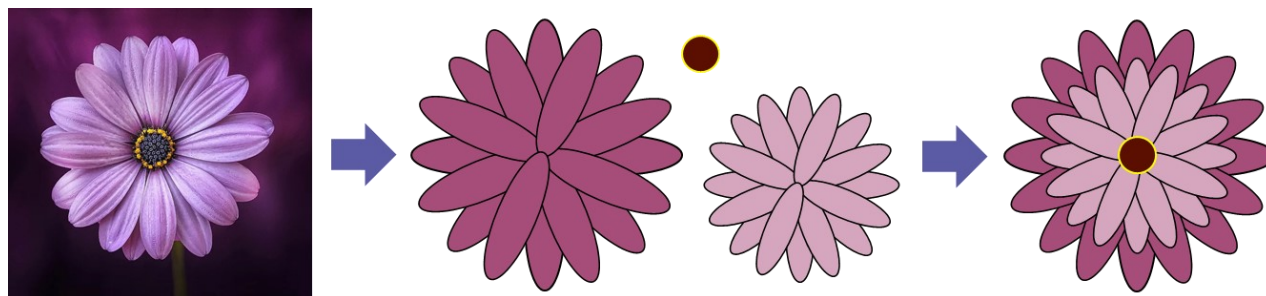

- Made on the computer
- Made using lines and shapes
- Made by putting the lines and shapes together to form a complete image

### Vector Drawing Skills

- Copy and paste
- Select and zoom
- Shapes and fill colours
- Border colours and styles
- Layering
- Grouping

Layering in Nature: Different layers of colour (dark and light) can help to make vector drawings look more realistic.

### Key Vocabulary

alignment guides	
grouping	Grouped objects act as though they are a single object
object	When you create vector drawings, each shape is called an object
shortcuts	You can use the keyboard shortcuts to complete these actions quickly: Ctrl C – Copy Ctrl V – Paste Ctrl Z – Undo
size guides	 Enable you to resize objects
