Vocabulary for Describing

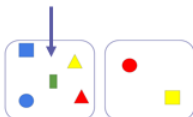

shape

size

more than

less than

colour

same

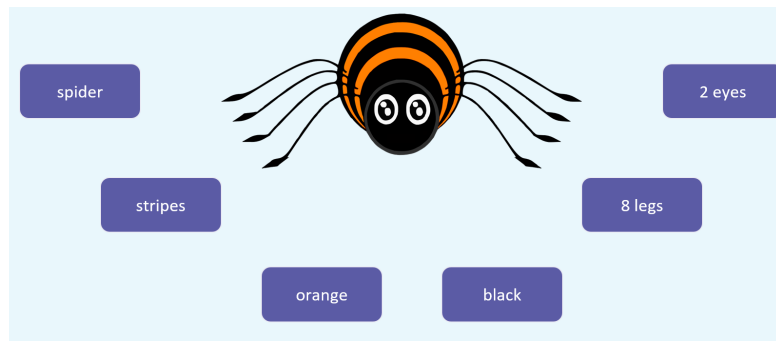

most

least

Labels

Labels are words or phrases used to describe someone or something.

Remember: Computers are not intelligent and require input from humans to perform tasks.

Key Vocabulary

comparing

Looking at what is similar and what is different

data set

A collection of related data

group

A number of people or things that are put together

object

Anything that can be labelled with properties

property

A property is used to describe an object. People can use properties to tell computers what objects are and how to sort them.
