Computing

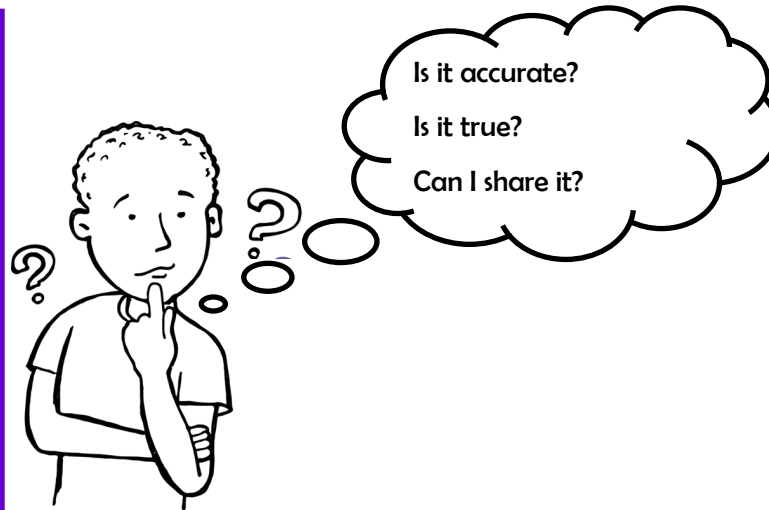

Always keep your network safe. It is as important as locking your front door!

The World Wide Web (web)

A **website** is a collection of pages, under one name.

A **web address** starts with **www.** which is an abbreviation of World Wide Web.

A **web page** is a single page or document on the World Wide Web.

Web Browsers

The World Wide Web and the Internet are not the same thing. Do you know the difference?

Key Vocabulary

Internet	A global network of networks connected by physical cables. The cables can be on land or under the sea.
Computer Network	Two or more computers joined together to enable information to be shared between them
Network switch	A device that enables multiple devices on a network to be connected
Server	A computer that manages the network and stores files
Router	A router passes messages from one network to another. It 'routes' messages to their destination
